SUBJECT: FY 1975 Program Bulletin No. 3

and funding associated with your Objectives does not have to equate to the totals for your office; hence, it is not necessary to cover every facet of your operation in your Objectives. Your current Objectives should be aimed at the FY 1975 timeframe and should be commensurate with what you hope to attain during the target year.

4. By this time your Budget Officer should have the Mark figure for FY 73 and FY 74. He has a deadline of 24 January to submit his changes to OCS for the ABCS. This will bring this document into agreement with the Mark and give you a starting point for the Program. By 29 January OCS is to furnish your office an ABCS printout reflecting your changes and leaving FY 75 blank. Any corrections to this printout will be due in OCS by 31 January. FY 75 will be submitted to ABCS subsequent to that time. Because of the indefinite timing of a final Program ABCS run, we will need your FY 75 numbers with your draft submission, using the form furnished you in your Forms Booklet.
